Rockville, MD 20852

Commissioner Henney,

I am concerned with the release of genetically-engineered foods or products into our environment without a mechanism for the public to know when they are in our food.

I support the petition by the Center for Food Safety that no new genetically-engineered Foods, or products with GE ingredients, be released until the Food and Drug Administration requires long term testing before they go to market and that all GE foods presently on the market or in the future be labeled, giving consumers the right to know what is in the food they are eating.

Sincerely,

David R. Erbaugh
